INVESTMENT OBJECTIVE

The investment objective of Warwyck Phoenix Global Invest Fund 6 is to generate long-term absolute returns using a top-down and directional investment approach to identify investment opportunities and trends throughout the world, including both developed and emerging markets. The Sub-Fund has a medium-term investment horizon and is targeting investors globally with a high-risk tolerance, mainly from Switzerland and United Kingdom.

The Sub-Fund can invest globally across a wide range of asset classes, including equities, fixed income, currencies, derivatives, mutual funds, ETFs, commodities, and precious metals to meet its investment objective. Such investment shall be made primarily in countries such as France, Monaco, Luxembourg and Singapore. The Sub-Fund employs a tactical allocation from time to time by investing in low-risk instruments to diversify the portfolio and minimize volatility and losses.

The VCC's Board of Directors has the flexibility to shift the Sub-Fund's portfolio allocation from time to time across asset classes and markets around the world, including emerging markets.

INVESTMENT STRATEGY AND DIVERSIFICATION

Trading strategies are applied to a spectrum of markets, asset classes (stocks, bonds, currencies, commodities) and financial instruments (such as cash, futures, derivatives). The Board will reach investment decisions based on the forecasts and predictions of changes in interest rates, inflation, economic cycles, and political circumstances.

Once it has identified trends, the Board establishes positions (long or short) in stocks, bonds, currencies, and commodities.

The trading approach is opportunistic and nimble, focusing on the use of highly liquid instruments to facilitate rapid changes in positioning as older trades are reversed and new opportunities are identified.

The Sub-Fund may employ leverage or take a credit loan in cash from any bank or financial institution.

SPECIFIC RISK FACTORS

In addition to the risk factors set forth in the PPM, the following additional specific risk factors exist in connection with the Sub-Fund's investment policy to invest fixed-income vehicles and equity securities.

Inflation Risk: Inflation risk is the risk that the value of assets or income from fixed-income investments will be worth less in the future as inflation decreases the value of money. Inflation also tends to lead to higher interest rates which in turn cause bond prices to fall.

Non-Diversification Risk: If the Sub-Fund's investment in fixed-income vehicles represents a relatively significant percentage of the Sub-Fund's portfolio, the value of the portfolio will be more impacted by a loss on that vehicle than if the portfolio were more diversified.

Interest Rate Risk: Interest rate risk is the risk that the value of fixed-income vehicles will fall if interest rates increase. These securities typically fall in value when interest rates rise and rise in value when interest rates fall. Fixed income securities with longer periods before maturity are often more sensitive to interest rate changes. Hence when interest rates rise, fixed-income vehicles prices fall and conversely when interest rates fall, fixed-income vehicles prices rise. The longer the time to a bond maturity, the greater the interest rate risks.

Economic Climate: The reporting of weak economic data such as unemployment figures, house buying, consumer confidence, gross domestic product, inflation etc. can have a direct or indirect impact on the value of a chosen stock.

Past Performance: Past performance is no indication of future performance, although investment decisions may contribute some weight to a stock past performance when deciding to invest in the stock.

Taxation Risks: Taxation risk involves the taxation laws of the jurisdiction in which a corporation is domiciled. Local tax laws may impose withholding taxes or other taxes on the payment of dividends on a stock or the payment of interest on a fixed-income security.

Counterparty Risk: Any monies or assets held by counterparties on behalf of the Fund may be at risk and be unrecoverable if the counterparty defaults.

Default Risk: Default risk is the risk that the issuer of the fixed income vehicle defaults with any payment in relation to the fixed income vehicle issued. Lenders and Investors are exposed to default risk in virtually all forms of credit extensions. The global economy is currently experiencing a “sovereign debt crisis” whereby certain member states of the European Union are on the verge of technically defaulting on their sovereign debt.

Currency Exchange Risk: Investments may be made which are denominated in currencies other than the base currency of the Sub-Fund. Due to currency exchange, there is a risk that any gains in investment value will be off set against a change in exchange rate.

Emerging/Developing Country Risks: The relevant Sub-Fund may invest in certain emerging market countries which are more speculative in nature, are subject to greater market fluctuations and risk of loss than normally associated with investments in more developed and more politically and economically stable jurisdictions with more sophisticated capital markets and regulatory regimes, such as the United States and Western Europe.

The Foreign Account Tax Compliance Act (FATCA): FATCA is U.S legislation relating to combating tax evasion and the recouping of tax revenues. FATCA requires that non-U.S foreign financial institutions identify and disclose their U.S members or be subject to a 30.00% withholding tax on any U.S sourced income paid on or after the 1st January 2014. Investors should be aware that certain information on investor required on subscription of shares to the Fund could ultimately be disclosed to U.S authorities.

THE FOREGOING LIST OF RISK FACTORS DOES NOT PURPORT TO BE A COMPLETE EXPLANATION OF THE RISKS INVOLVED IN THIS OFFERING. PROSPECTIVE INVESTORS SHOULD READ THIS ENTIRE MEMORANDUM AND THE PRIVATE PLACEMENT MEMORANDUM AND CONSULT WITH THEIR PROFESSIONAL ADVISERS BEFORE DETERMINING WHETHER TO INVEST IN THE FUND.

Redemption of part of a holding of Class K Participating Shares may be refused if, because of such redemption, an Investor would then hold Class K Participating Shares with a value of less than EUR 50,000.

The Directors may, in their absolute discretion, refuse to redeem any Participating Shares if in their opinion the Sub-Fund sufficient cash resources does not have to complete the redemption and/or in the event the Directors believe that such an action will be materially detrimental to the remaining Investors. Settlement will be effected by telegraphic transfer in accordance with the redeeming Investor's instructions. All redemption monies will be paid in Euro. In all cases, payment will be effected at the risk of the redeeming Investor and bank charges will be borne by the Investor. In addition, it should be noted that payments will only be made to the relevant Investor, and not to any third party whatsoever.

The Board reserves the right to vary any of the redemption requirements of the Sub-Fund.

TRANSFER OF SHARES

An existing Investor wishing to sell, assign or transfer its Participating Shares to another party may do so without the prior written consent of the Directors, provided that any such sale, assignment or transfer is made to a Qualified Investor.
